

Dear sirs

I truly do hope you take the time to hear this letter as we truly believe
In this program.

As in everyone's life at one time or another we have made bad decisions
witch haunted us.

The system as a whole is very unforgiving and pelages a person for the rest
of there lives.

Everyone in our family have made bad and good decisions about our children
And have had a relationship with DFCS in the past.

For the most part DFCS never considered the human and the emotional aspects
of the family as a whole and everything was black or white.

This way of thinking caused the needless breakup of many children with there
parents and the destruction of the family as a whole.

This new program considers both the children and the parents by keeping
our children united with the parents and helping both our needs.

DFCS has become support for our family helping with willaims needs as
well as ours with a genuine concern for our wellbeing .

DFCS is going out of there way to help and reinforce our family by any
means at there disposal even by bringing to the house little things that we need.

The caseworker is looked at more like family than a judge and is welcome
At any time.

We never thought we would be saying this but these caring individuals have
Enriched our lives and taken away a lot of stress.

In closing we are truly sorry we could not be there to support our extended
Family and confidants because they truly deserve our praise!

Sincerely

Teresa Regan
